1. The following table gives the production, in tons, of the Stettin Iron and Steel Works, for the months of January to November, 1950 inclusive:

January	8,612	July	8,879
February	6,694	August	6,147
March	8,586	September	8,531
April	8,560	October	1,001
May	7,513	November	8,331
June	8,595		

One furnace is in use. There are 895 workmen, out of 1176 required to operate the plant adequately.

2. As a result of the policy of paying premiums based only on total output, regardless of quality, Polish foundries have adopted the practice of returning an overall tonnage figure for their production, without break-down into types and qualities. This is done with the object of concealing the fact that they have concentrated on the more easily produced types of steel in order to earn the highest possible premium.
